

MP3stamp

The perfect solution to add HiFi audio to any project!
A single module that manages Flash Memory Cards and MP3 decoding.

PicoJukeBox

A micro JukeBox with an integrated power supply (6 to 24V) and a speaker and that's run.

MP3Touch

Touch & Play!
The best solution for the interactive sounds started by a simple touch.

MP3Can

A module for interactive sound installations with integrated 2W amplifier that communicates via CAN-bus.

eGuide

An interactive and multilingual repeater equipped with a standard memory card. It is very simple to use and has a huge autonomy (from 20 hours to more than 40 hours).

µBox

Stores the audio files on its internal Flash memory, has a starting trigger, a single line out Cinch RCA and a standard Din Rail case.

Multichannel

Two available models:
- **Mixer Player:** 8 separate MP3 players, each with an independent controller, and a common single line out 2xMono Cinch RCA.
- **Mult Player:** 8 separate MP3 players, each with an independent controller, and 8 lines out 2xMono Cinch RCA (1 per player).

R&D

Our **R&D department** can research and develop a prototype or a mass-production of different electronic devices. Such as **LED Lights show controllers**, **HD Video intelligent players**. ... Radio, Ethernet, Wifi, Smartphone remote applications to manage these systems.

bBox

A professional mp3 player with integrated power amplifier (2x20 W Stereo). The tracks can be started via triggers or through a communication port (Rail Din case)

REALITY SYS sa

Reality Sys sa designs, manufactures and distributes a range of tiny professional **audio/video intelligent players/repeaters (interactive and programmable)**. The company's innovative hardware, cutting-edge technology and the resulted applications enable our clients to experience high-quality digital sounds.

Our systems are based on industry standards (FAT32 hard-drives or SD/ MMC/Compact Flash memory cards, mp3/avi/mpg, RS-232/485, Bus-Can, ZigBee and Din Rail mounting).

Main markets:
Museography & Scenography (cultural & touristic areas, museums, exhibitions), **marketing & events** (Point of Sales, waiting rooms, show rooms, urban furnishings), **industrial security** (robots, automation), **transportation** (road buses, cruise ships, rail coaches, airplanes, elevators), **alarm & security** (home, shops & office access control), **vending machines** (intelligent automatic distributors), **messaging system** (answering machines, telecom PABX), home & public electronic OEM.

These small equipments automatically start the appropriate audio tracks by a simple dry contact or relay (NO-Normally Opened, or NC-Normally Closed), by a serial port (RS-232/485) or via the network (wire or wireless, CAN-bus, ZigBee).

The messages can be information (multilingual), promotion or advertising, safety messages (preventive or reactive), instruction manuals (use, maintenance), sounds (siren, beep, bell, etc.), or off course music, etc.

CULTURE TOURISM
